WASEEM ALSEES

AI Engineer | NLP · Computer Vision · AI Systems

Damascus, Syria | +963959578857 | waseemalsis73@gmail.com | linkedin.com/in/waseemalsis | github.com/waseemalsis

PROFESSIONAL SUMMARY

Developed and deployed AI systems achieving 92% accuracy and reducing manual work by 40%. AI Engineer with hands-on experience in machine learning, NLP, computer vision, and AI-powered web development. Skilled prompt engineer with expertise in leveraging AI tools (GitHub Copilot, ChatGPT) to accelerate full-stack development across multiple frameworks and deliver production-ready solutions. Experienced in coordinating AI projects alongside hands-on model development — from requirements gathering to deployment. Core ML stack: Python, TensorFlow, PyTorch, HuggingFace Transformers.

TECHNICAL SKILLS

AI / ML: TensorFlow · Keras · PyTorch · Scikit-learn · HuggingFace Transformers · Rasa · CNN · LSTM · BERT · T5
AI Tools & Prompt Engineering: ChatGPT · GitHub Copilot · Cursor · Prompt Design & Optimization · AI-assisted development workflows
AI Content Creation: AI image generation · AI video production · Generative AI content workflows · Visual storytelling
Web Development: React · Next.js · Vue.js · Node.js · Django · REST API development · AI integration in web apps
Deployment & Backend: FastAPI · Flask · Model deployment · Vercel · Docker · REST API development
Project Coordination: AI project lifecycle · Team coordination alongside hands-on development · Stakeholder communication · Agile Fundamentals
Languages & Tools: Python · C++ · JavaScript · HTML · CSS · OpenCV · Pandas · NumPy · MySQL · Git · GitHub · Jupyter

PROJECTS

Smart Waste Classifier | *Python · TensorFlow · CNN · OpenCV · FastAPI* *2024*

- Designed and deployed a CNN model via FastAPI for automated multi-class waste sorting with real-time inference capability.
- Achieved 92% classification accuracy and reduced manual sorting time by 40%, improving overall workflow efficiency. | github.com/waseemalsis/smart-waste-classifier

Arabic Conversational Chatbot | *Python · Rasa · Arabic NLP · Flask* *2024*

- Built and deployed an Arabic-language chatbot (Flask), trained on 1,000+ dialogues and used by 50+ test users during evaluation.
- Achieved 85% intent recognition accuracy and improved response time by 30% through custom NLU pipeline optimization. | github.com/waseemalsis/arabic-chatbot

Multilingual Question Generation System | *PyTorch · HuggingFace · T5 · REST API* *2023*

- Fine-tuned multilingual T5 and exposed via REST API; reduced exam question creation time by 50% across Arabic and English.
- Applied prompt engineering and beam search decoding, improving question diversity and grammatical accuracy by 35%.

EXPERIENCE

AI Project Coordinator & Program Lead | **Al Sham Private University** | Remote, Syria *Feb 2021 – Apr 2025*

- Planned and delivered 10+ AI workshops and hackathons, growing student STEM participation by 60% over 4 years.
- Coordinated cross-functional teams of 15+ volunteers; reduced onboarding time by 40% through structured mentoring.
- Liaised between faculty and student teams to align 100% of program deliverables with academic AI curriculum goals.

EDUCATION

B.Sc. in Information Engineering, Specialization: Artificial Intelligence — Al Sham Private University, Damascus, Syria *Graduated 2025*

Coursework: Deep Learning · Computer Vision · NLP · Data Structures & Algorithms · Software Engineering · Statistics for ML

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency
